to proceed.

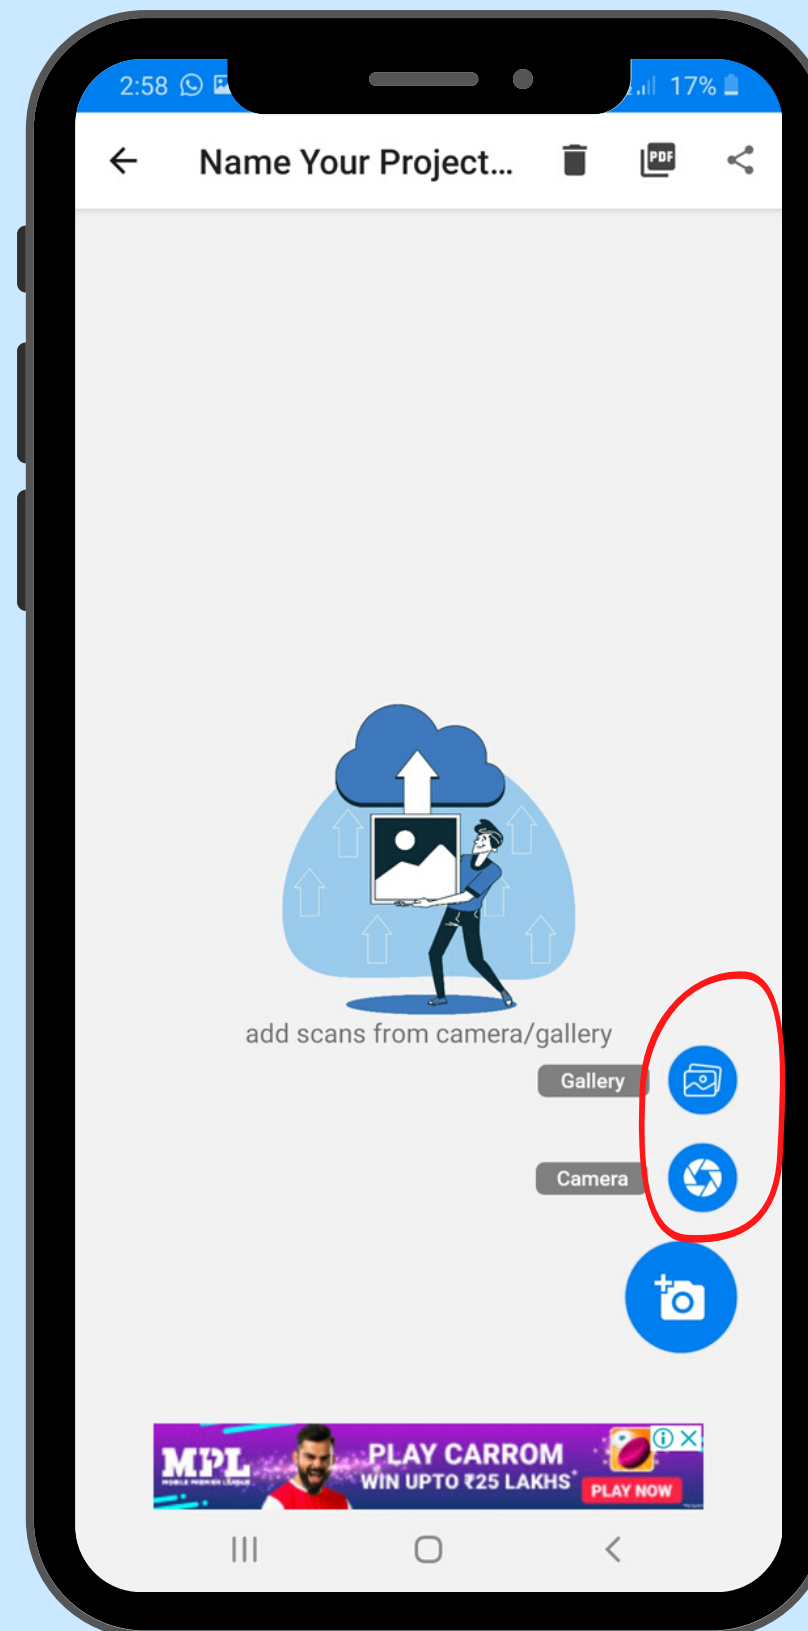

NEW PROJECT

In IndiScan every document is known as a project. Click on the "New Project" button. You can scan and add pages in the project and export it as JPEG/PDF later on.

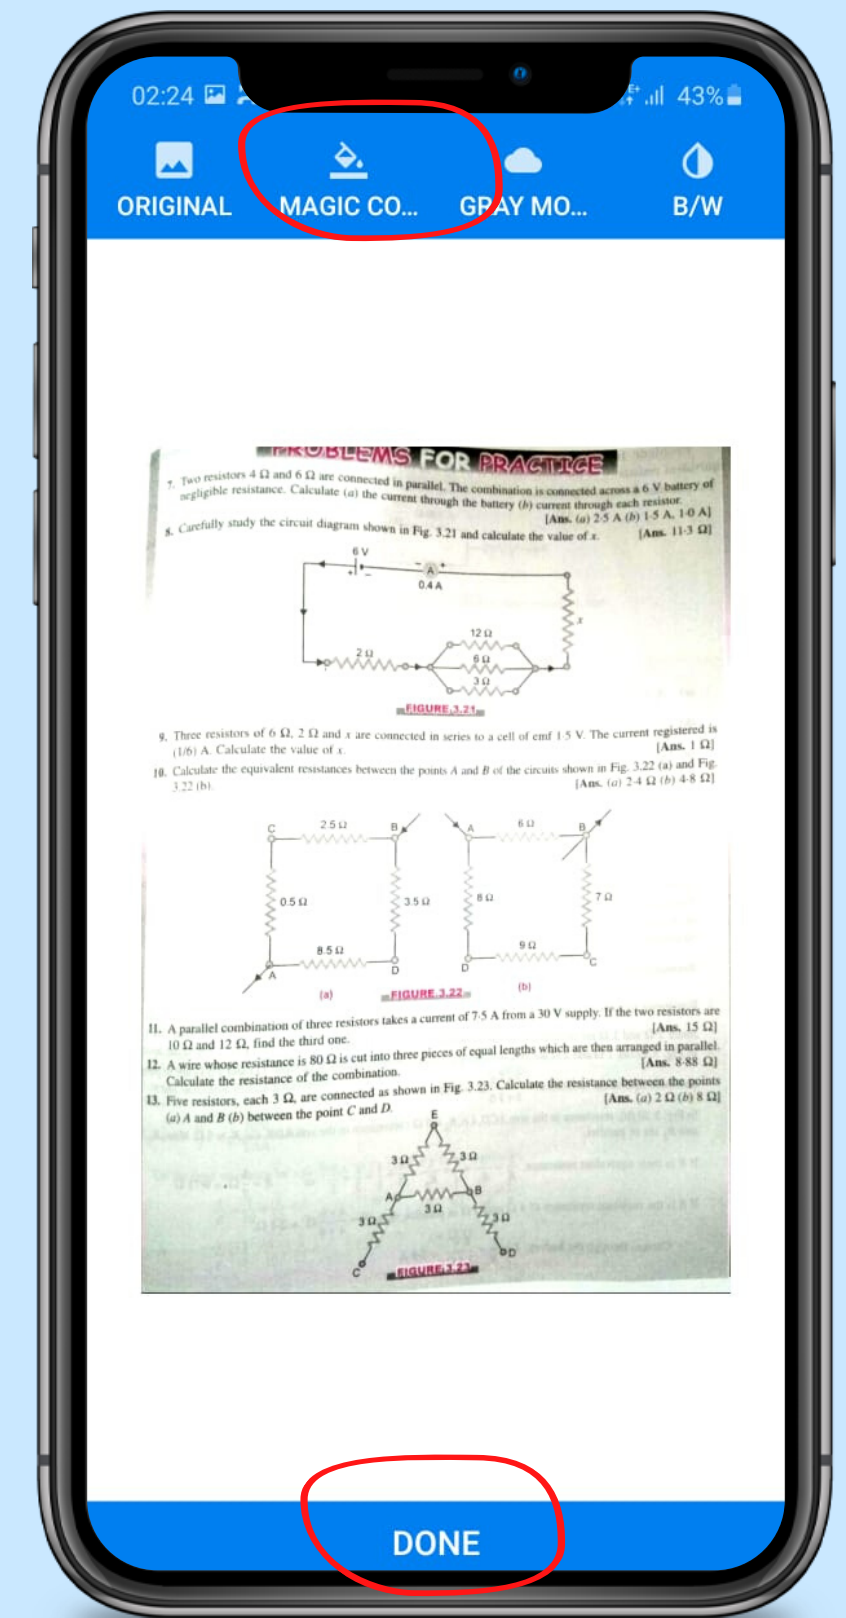

Click on the camera icon to add an image from the camera or your gallery.

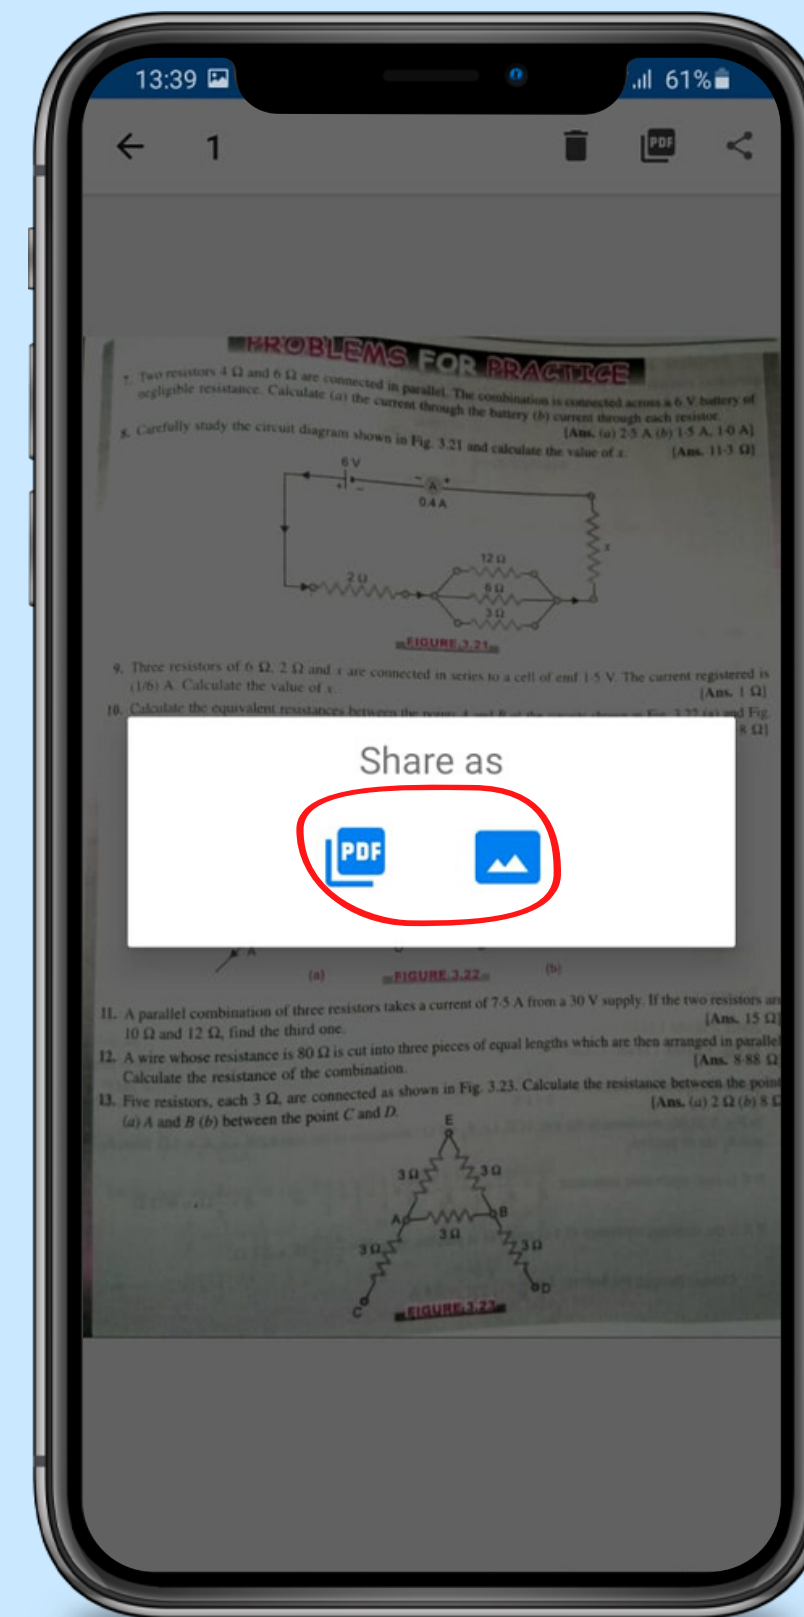

Click on the Gallery option to open the gallery and select image from there, or select the camera icon to open the camera and click a picture to add.

After selecting the picture, the OpenCV library will perform image correction on it and then will ask you to select your desired mode of color.

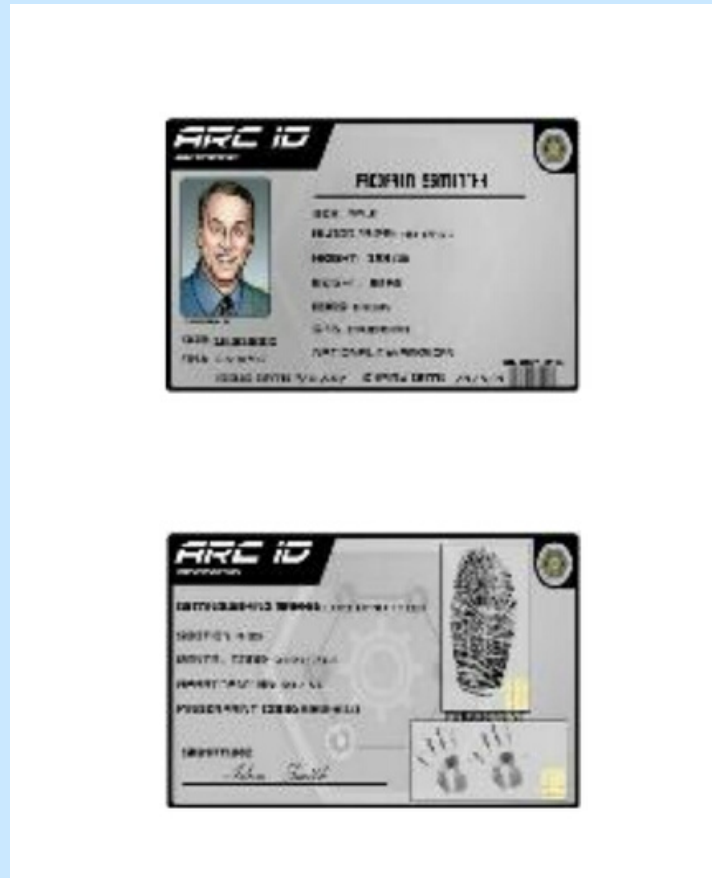

Images gets added to the project. You can add as many images you want by following the same process.

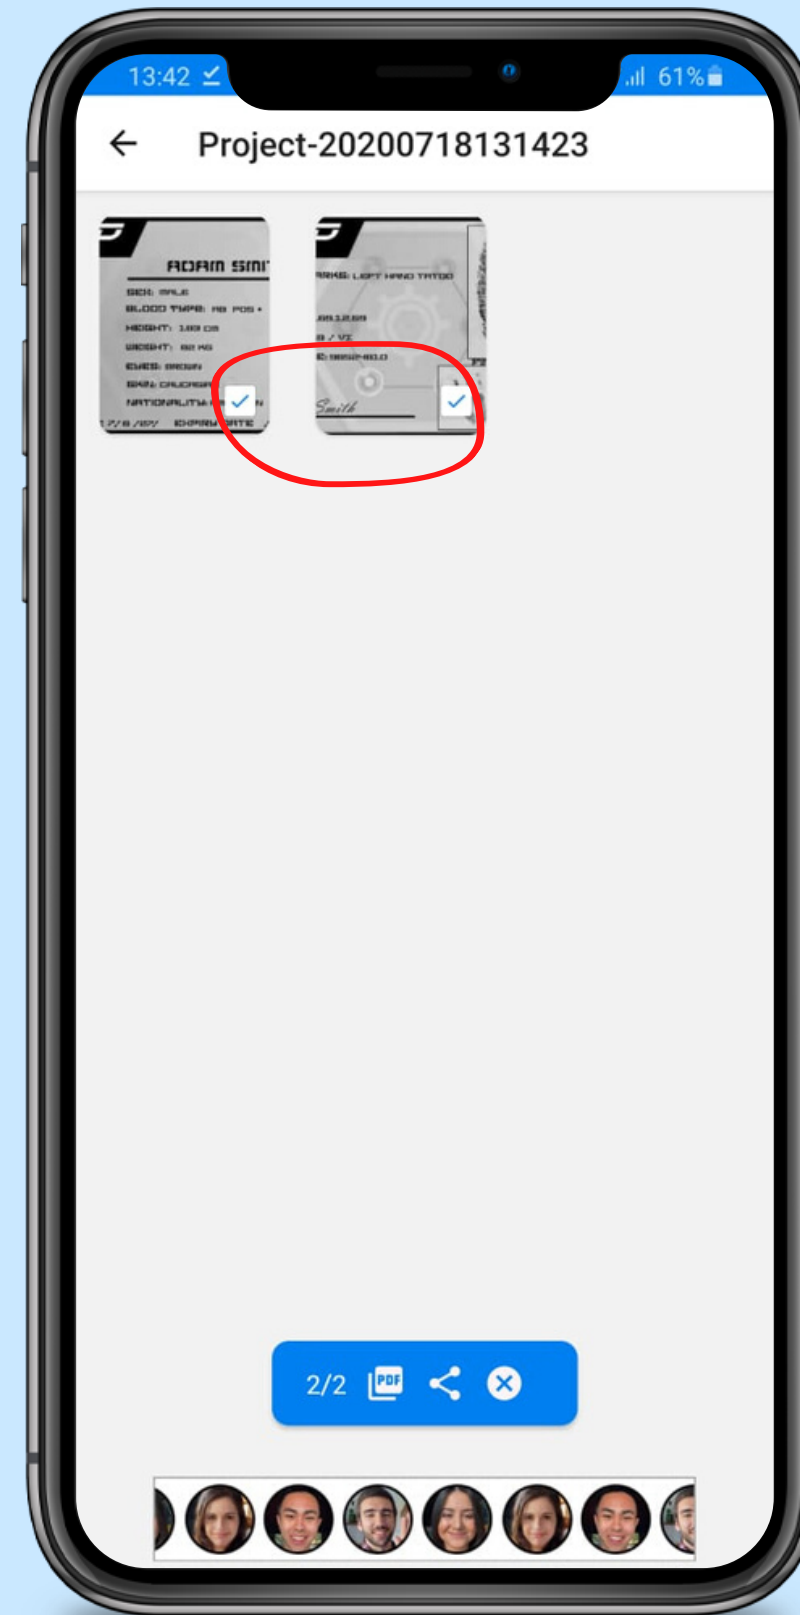

Share the document as JPEG or PDF

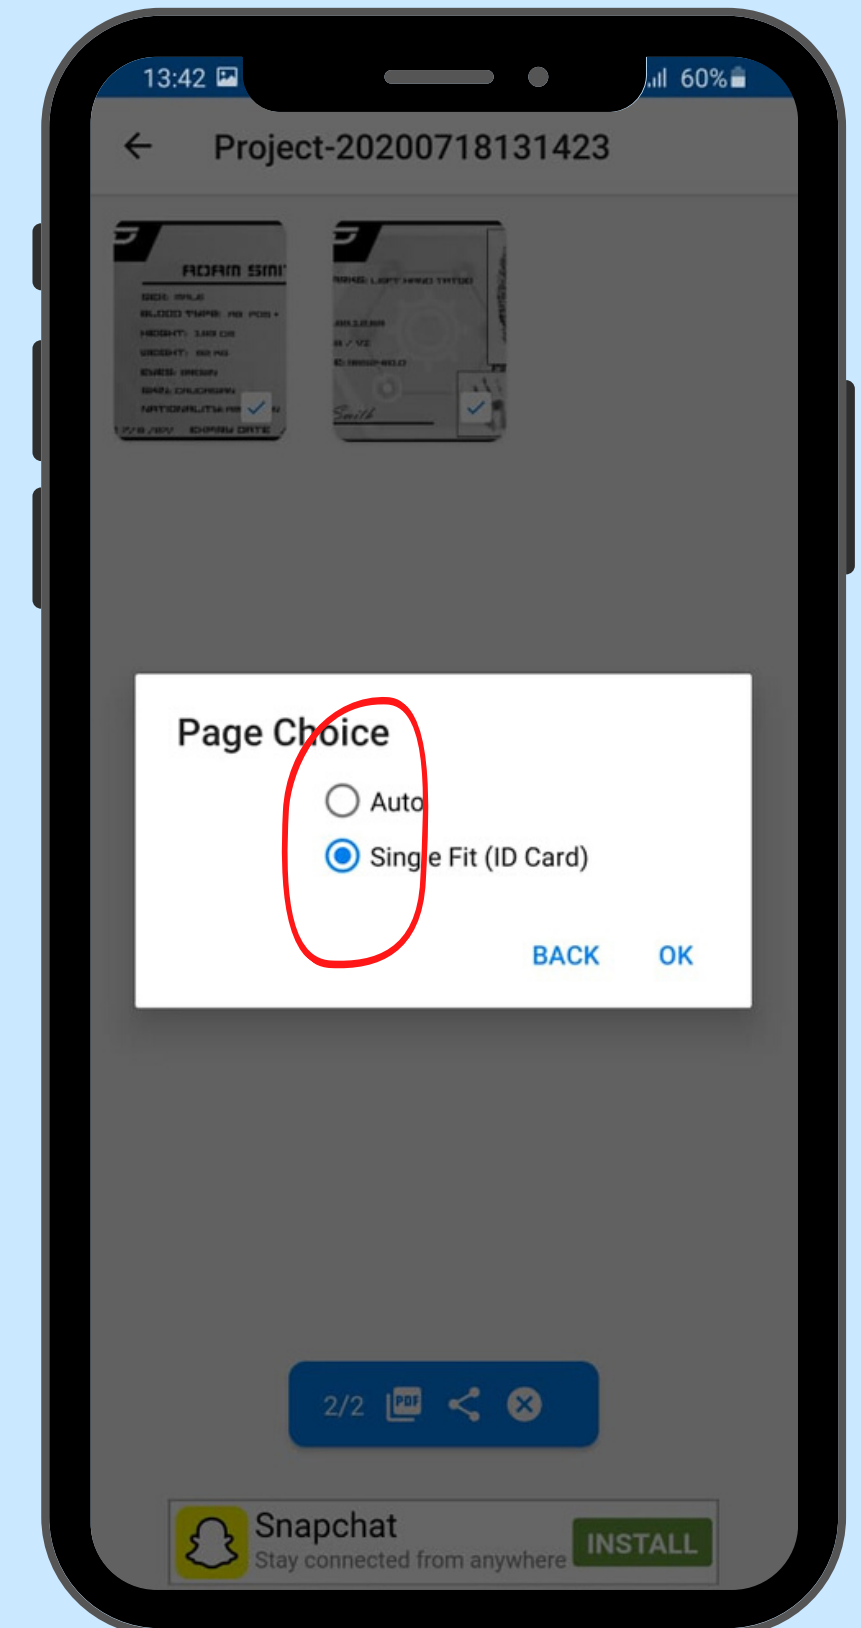

ID MODE

Many time you may need to scan ID's and make documents out of those. we have introduced ID mode to make the process easier.

Long press on any image to enter multiple select mode. Select 2 images to export as ID.

Select Single fit (ID card) mode and click ok
